

## To sign up for Google Groups

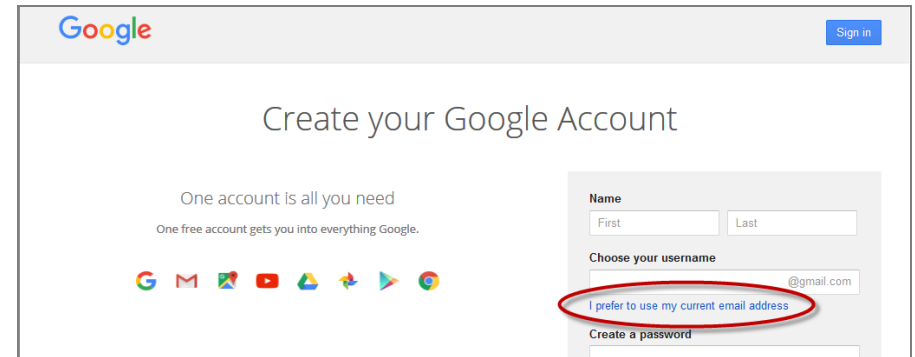

### How to access the Google group WITHOUT a gmail address

You will have to go through a few steps (as Google really wants you to "join up" with a gmail address), but it's straightforward ...

- [Click on this link](#)
- Click **'Sign in'** (there should be two links on the screen)
- Click **'More options'** ...      ... and then click **'Create account'**

- Click **'I prefer to use my current email address'** (see below)

- Now enter your normal email address, complete the rest of the form and then click **'Next step'**
- You will be asked to agree to the Google Privacy and Terms (you must do this) However, you can control how they collect and use this data (see below)
- A verification email will be sent to you – simply click on the link
- You should now be able to access the Google group and you will begin receiving emails

To control how Google collects and uses data  
click on the link below
